DETAILED ACTION

Drawings

1. New corrected drawings for Figures 6A and 6B are required in this application because Figures 6A and 6B are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: on page 1, lines 11-12 the status of the co-pending application should be updated.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The instant claims are indefinite for the following reasons:

- (a) In claim 1, lines 9-10, "wherein said semiconductor laser element is configured....." is indefinite. It is unclear as to what structure applicant intends to claim.

Art Unit: 2828

- (b) In claim 16, line 7, "a semiconductor laser element configured....." is indefinite. It is unclear as to what structure applicant intends to claim.
- (c) Claims 5, 6, 1, 12, 22, 27, and 28 fail to end with the required period.

Allowable Subject Matter

5. Claims 32 and 33 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakamura et al (5,299,214) and Derkits, Jr. et al (5,559,817) teach heat sinks for semiconductor lasers.
